Family Support Centers

# Family Support in Maryland

## THANK YOU!

My name is Paola I am 18 years old mother of Sarai 4 years old and Mia 9 months old I am more than blessed to be part of the Family Support Center

I cannot say thank you enough to each one of the teachers and members of the FSC if it was not for them

I would not be where I am today THANK YOU! I miss my teachers and the staff members so much I miss being in the center. I want to say thank you for continuing to help us during this pandemic for not giving up on us and not letting us give up on our selves and all though I already graduated I am still part of this amazing program and I love it thank you for the time and activities that you guys take for our children.

### Promoting Protective Factors for Child Safety & Well Being

Protective factors are conditions or characteristics that reduce or eliminate risk to increase the health and wellbeing of children and families.

Family Partnership helps families build these protective factors through the child and family services we offer, helping children and families build and strengthen these skills and resources:

Social  
Connections

Parent  
Resilience

Concrete  
Support

Nurturing &  
Attachment

Knowledge  
of Parenting &  
Child Development

Social &  
Emotional  
Competence

Throughout the month of April, Month of the Young Child,  
Family Partnership will be sharing ways to build these protective factors.
